Danylo

AI creator & video editor — short-form vertical video

Prague, Czechia · remote
Telegram **@danylo_mf**
agencydrave-byte.github.io/video-creator-portfolio

I make short-form vertical video for **Instagram Reels and TikTok** — both ordinary edits from raw footage and video that was never filmed at all: the script, the shot list and the prompts written in **Claude Code**, the picture generated in **Higgsfield**, then cut, graded and finished by hand. **A year and a half of editing** behind me, on freelance jobs and on my own projects, with **32 finished pieces** in the portfolio. I run a project end to end, alone, from the first message to the delivered file.

EXPERIENCE

AI creator & video editor — freelance

2025 — now

Remote · clients in any country

- **32 published pieces**: 20 fully AI-generated, 12 conventional edits — spots, UGC ads, brand teasers, explainers, podcast cuts.
- Vertical short-form built the way the feed needs it: the hook in the first seconds, cuts on the beat, captions readable on a phone, sound that does not fight the voice.
- Whole AI pipeline on my own: **script and prompts in Claude Code**, **generation in Higgsfield**, then editing, colour, sound and titles by hand.
- Direct contact with the client instead of a chain of managers — brief, cut, revisions and delivery while the material is still worth posting.

Personal projects & team work

ongoing

Own content · shared projects with a team

- Worked **in a team** on shared projects: split tasks, handed work over, kept deadlines and went through review.
- Keep shooting and cutting for myself — that is where new formats and new generation tools get tested before they go to a client.

BEYOND WORK

Sport, regularly — it keeps the discipline that long edits need. And a genuine interest in where AI is going: I believe the future belongs to it, so I try every new generation model as it comes out.
